

Wall mounted basketball shooting station

1621115
1621103

This basketball unit for training purposes has a 2 gas springs for easy height adjustment. Height adjustment works via a simple click mechanism on the basket which you unblock using the supplied operating rod. Two additional safety straps prevent maximum pressure on the gas springs. The system is supplied with a wooden backboard, fixed ring, Enkalon net and control rod.

- Very stable 3 x 3 point frame.
- Easily adjustable to 3 different positions.
- Ring attached to steel back frame.
- Low maintenance.

Technical data:

Materials:	2 steel frames in a triangular shape and additional board frame at the back of the board, made from tubular profiles 30x30x2 mm, powder coated. Supplied with additional 8 mm support panel behind the ring attachment. Triangular shaped steel wall frame 60x10 mm.
Back frame:	The 2 triangular shapes provide near perfect stability with hardly any vibration.
Operation:	2 gas springs lift the construction upwards. The spring-based click system on the frame is blocked or unblocked with the supplied operation rod.
Safety:	2 safety straps prevent maximum pressure on the gas springs and provide additional fall protection.
Projection:	100 cm from the wall.
Backboard:	Waterproof 18 mm plywood board.
Padding:	Included with 1621103, optional by 1621115.
Ring:	Stationary ring conform to NEN-EN 1270 standard, compact, with safe net hooks, orange RAL 2004.
Net:	Heavy duty woven Enkalon cord, white.
Height adjustment:	Adjustable to 260, 280 or 305 cm, or folded back fully against the wall (storage position).
Operating rod:	16 mm metal tube with a synthetic protective finish.
Applicable standard:	NEN-EN 1270
