

Horizontal bar/Balance beam installation

The combinations with this system are endless. A rotating wall bar with 3 sections or 4 sections, a horizontal bar, a balance beam, whatever you like.

In the blink of an eye, a challenging course can be created and then quickly and easily stored away again after use. Adapted storage brackets allow organised storage.

We would be happy to advise you on creating a solution for your sports hall, based on your wishes and the requirements of the hall.

rectangular balance beam with hanging fittings

Horizontal bar with quick locking system: easy and secure locking

Rotating wall bars in combination with socketed uprights and grooved bar
